### Missing Girl Found

**Smith Student Discovered Under Porch of Wellesley Home**

Wellesley, Mass.—(AP)—A 20-year-old Smith College senior—who vanished Monday after telling her mother she was going hiking—was found yesterday semi-conscious but apparently uninjured under the porch of her home.

While searchers fanned out in a widespread search, Sylvia Plath was located by her brother, Warren, 18, and her grandmother, Mrs. Aurella Schobar, 66, who heard moaning coming from the cellar of their home.

Police Chief Robert McVey said an empty water jar and a container of eight sleeping tablets were found by the girl's side. He

more teachers to supervise them. Most of this year's increase is expected in elementary schools, where a gain of 1,600,000 pupils will swell the total to 28,931,000. An extra 300,000 will push high school enrollment to 7,302,000, Thurston predicted, and colleges and universities will enroll 2½ millions for a gain of another 100,000.

said the bottle had contained 48 tablets when full.

Her mother, Mrs. Aurella S. Plath, a Boston University professor, said her daughter recently had been depressed.

### Abbey Crumbling

**Famed London Building Is in Grave Danger, Archdeacon Says**

London.—(AP)—The stone work of Westminster Abbey "suffers from some terrible disease," the archdeacon, Dr. Adam Fox, said yesterday.

"The Abbey is in grave danger," he warned a news conference at which Abbey officials resumed their campaign for a million pound (\$2,800,000) restoration fund. "Built long ago with skill and genius, many parts are crumbling away."

## Journal Information Service

Readers can get the answer to any question of fact by writing the Providence Journal Information Bureau, 1200 Eye Street N.W., Washington 5 D.C. Please enclose three (3) cents for return postage.

**Q. When did the first through train cross the United States, and how long did it take?**

S. L. M.

**A.** The first train ever operated from the Atlantic to the Pacific was the Trans-Continental Excursion sponsored by the Boston Board of Trade in May, 1870. The trip from Boston to San Francisco took eight days.

**Q. Has an entire city ever before been wiped out by an earthquake, such as happened recently in Greece?**

H. G. O.

**A.** On June 7, 1692, a tremendous earthquake practically wiped out the town of Port Royal on the island of Jamaica in the British West Indies. The town was then "the pirate's Babylon and the wickedest city of its day." In the space of two minutes, all the churches, houses and sugar works of the whole island were thrown down; two-thirds of the city was swallowed up by the sea; all its fortifications were demolished; most of its inhabitants were either injured or drowned.

**Q. Why is the Chicago "Loop" so called?**

R. M.

**A.** The center of the business section of Chicago lies in the Y formed by the two branches of the Chicago River, and was named "The Loop" because it is surrounded by a loop of elevated rail-

and varnish remover or alcohol for this purpose.

**Q. How much of the wood consumed in the U.S. is imported?**

F. D.

**A.** The National Production Authority says that wood is imported in a great variety of forms but that only pulpwood and lumber are imported in quantities great enough to be significant. We imported about 10 per cent of our pulpwood in 1951 and six per cent of our lumber, most of this coming from Canada.

**Q. Is there any place in the U.S. which cannot be reached overland except through a foreign country?**

H.A. K.

**A.** There are two such places. One area is in the Lake of the Woods country in Minnesota, which can be reached by boat through American waters but can be reached by land only over Canadian territory. The other place is Point Roberts, Whatcom County, Washington. This is situated at the tip of a peninsula, the body of which belongs to Canada under the terms of the Oregon Treaty of 1846. Point Roberts is cut off from the rest of Whatcom County by Boundary Bay.

**OUR PRESIDENTS FROM WASHINGTON TO EISENHOWER**  
This edition of OUR PRESIDENTS AND THEIR WIVES includes a four-page feature entitled "Interesting Facts About the Presidents," which is gripping reading for every American. This distinctive 56-page

## Selective Service To Move Monday

### Other Federal Office Changes Also Listed

In one of a series of reallocations of government space, the state Selective Service Headquarters will move Monday from its location at the old Walsh-Kaise shipyard to Room 317 of the Post Office Annex, vacated by the Office of Rent Stabilization.

Selective Service will also be given some space now occupied by the Navy Recruiting Office and the Social Security Administration. J. J. O'Connor, regional director of the General Services Administration at Boston, government housekeeping agency, said the move will mean an annual rent saving of \$8,200.

Col. Lloyd C. Wilson, state director of selective service, said his national headquarters has protested the move. Selective Service officials prefer the Washington Avenue building because of ample parking facilities and its proximity to the Army's induction center.

Other changes are: Navy Recruiting will move temporarily into Room 508 in the Federal Building later into two second floor rooms. The fifth floor space used by the Providence district office of the U.S. Census Bureau, closing this week, will be allocated to the Veterans Re-employment Service.

The office of Sen. Pastore has been moved from Rooms 900, 911 to
